The upgraded vehicle integrates a refurbished and improved armored capsule from an existing vehicle with a new high-power automotive power train, chassis and independent suspension made by ArvinMeritor.[3] Greater survivability is achieved through an enhanced monolithic floor, a strengthened chassis frame and better blast absorbing seats.[4] On December 18, 2011, a Caiman was part of the last US military convoy out of Iraq, being the last vehicle to cross the border into Kuwait, signifying the end of US military presence and operations in the eight-year Iraq War. It is now produced by BAE Systems Platforms & Services, formerly BAE Systems Land & Armaments. Starting in October 2013, local police and sheriff offices throughout the United States began assuming control of many Caiman 6x6 MTVs. The US Federal Government offered these vehicles to local jurisdictions as the need for them greatly decreased after the Iraq and Afghanistan wars ended. Design and protection The Caiman 6x6 is an armored vehicle with a V-shaped hull design based on the Family of Medium Tactical Vehicles (FMTV) and Low Signature Armored Cab (LSAC), initially developed by Stewart & Stevenson. To increase the armor, the Caiman Plus 6x6 is fitted large applique armor boxes on the side of the hull, also referred as the "Mama Bear" protection kit. www.armyrecognition.com. ^ "defence.professionals". As the other variants of the Caiman family vehicle, the Caiman Plus is based on the ultra-reliable FMTV (Family of Medium Tactical Vehicles) A1R chassis and the combat-proven Low Signature Armored Cab (LSAC). The Caiman Plus is an improved version of the standard Caiman wrapped with applique armor boxes on its sides. This award did not include the Caiman. Armor Holdings also owned O'Gara-Hess & Eisenhardt (which had exclusive rights to the up-armor kits the U.S. Military selected for their Humvees) and Integrated Textile Systems (who had an ultra high molecular weight polyethylene fiber called Tensylon that is processed into composite armor) at the time. Retrieved April 22, 2018. Retrieved June 29, 2016. Retrieved January 7, 2015.{{cite web}}: CS1 maint: archived copy as title (link) Wikimedia Commons has media related to BAE Caiman. A jammer system uses against IED threats is mounted at the front of the vehicle. By using our website, you agree that we can place these types of cookies on your device. The Caiman is based on the chassis and automotives of the Medium Tactical Vehicle variant of the FMTV and features: 10-man crew capacity Tensylon composite armor[2] Armor enhancement capable Accepts all types of manned and remote weapons stations 85 percent parts commonality with standard FMTV models (40,000 of which are already fielded) Full-time all wheel drive Fully automatic transmission Electronic Central Tire Inflation System (CTIS) Anti-lock braking system (ABS) Class V Interactive Electronic Technical Manuals (IETM) In August 2009, the U.S. Army announced that Oshkosh Defense had been awarded the FMTV A1P2 rebuy production contract. Archived from the original on October 6, 2008. The purpose of design is to increase vehicle and crew survivability by deflecting an upward directed blast from a landmine or IED (Improvised Explosive Device) away from the vehicle, while also presenting a sloped armor face. ^ "Archived copy". Archived from the original on June 28, 2011. In September 2010 BAE Systems has been awarded a \$629 million contract from the U.S. Mine Resistant Ambush Protected (MRAP) Joint Program Office (JPO) to upgrade 1,700 Caiman MRAP vehicles to Caiman Multi-Terrain Vehicle - Caiman MTV standard. The Caiman Plus 6x6 can run at a maximum speed of 105 km/h with a range of 650 km. Accessories Caiman's automotive design features include: Runflat Devices, Single Molded Piece with Integral Beadlock, Brakes, Primary Dual-Circuit, Four Channel Air,Anti-Lock Braking System (ABS) with Trailers ABS Connectors for Emergency Towing. Archived from the original on May 18, 2014. The Caiman Plus is designed and manufactured by the Company BAE Systems. ^ United States Northwest Regional SWAT Team is now equipped with Caiman 6x6 MRAP vehicle Archived 2013-11-09 at the Wayback Machine - Armyrecognition.com, 3 November 2013 ^ "Archived copy". Variants Caiman 4x4 Caiman 6x6 Technical Data Back to top Armament The Caiman Plus 6x6 can be fitted with armored glass open top turret, armed with a 7.62 mm machine gun mounted on the top at the front of the crew compartment. Description The Caiman completed testing by the US Military at the Aberdeen Proving Grounds in July 2007. Stewart & Stevenson was later acquired in 2005 by Armor Holdings, which developed the Caiman from the FMTV and LSAC designs. ^ "UNITED STATES SET TO PRESENT 24 MINE RESISTANT AMBUSH PROTECTED VEHICLES VALUED AT US\$11 MILLION TO THE NIGERIAN ARMY TODAY". The Caiman MTV normally costs \$412,000 but is sold for only its transportation costs to the local jurisdiction.[5][6] In September 2014, the U.S. approved a \$2.5 billion deal with the United Arab Emirates Army for over 4,500 surplus U.S. MRAPs for increased force protection, conducting humanitarian assistance operations, and protecting vital international commercial trade routes and critical infrastructure. Please help to improve this data by introducing more precise citations. The Caiman 6x6 Plus can be used for a full range of missions as reconnaissance, convoy operations, troop transport, combat engineer and EOD missions for maneuver units. Retrieved from " Mobility The Caiman Plus 6x6 is based on the chassis of the FMTV A1R1 chassis truck. Archived from the original on October 6, 2016. The Caiman plus is upgraded with 16 unique engineering change proposals to include "MAMA Bear Protection", improved suspension, enhanced fire suppression and 570 AMP alternator. Retrieved July 14, 2008. January 7, 2016.
